

Top Bifocal Shooting Glasses

One of the huge problems facing a lot of shooters, especially those of us over 40, is our inability to clearly see the front sight. The [Top Bifocal Shooting Glasses from SSP Eyewear](#) offer you the choice of a non magnified or a bifocal lens on either or both sides. Having the bifocal on top allows for a comfortable, heads up, shooting stance and brings the front sight into sharp focus.

Here are the bullet points from the manufacturers website:

- [Top Focal kits](#) have the magnifying portion at the top of the shooting glass.
- Interchangeable lenses allow you to personalize the shooting glasses to **view both your front sight and the target** according to your individual preference.
- Top Focal magnifier for **front sight acquisition** (right eye, left eye, or both eye dominant)
- Standard non magnifying lens, allows you to **view the target** with your non dominant eye
- **The kit includes a neoprene zipper pouch with 2 sets of permanent anti-fog lenses, a microfiber cleaning cloth and lens changing instructions.**
- Designed for pistol shooters and instructors allowing for in-focus view of front site
- Other users include mechanics, electricians and anyone doing overhead work
- **Exceeds ANSI Z87.1+2010 specifications for high impact protection**
- Anti-fog coating, is double sided & permanently bonded to the lens, lasting 65% longer
- Feature optically correct, decentered, shatterproof, polycarbonate lenses to virtually eliminate distortion
- Offer sharp peripheral vision, without any blind spots
- Permanent durable anti-scratch hard coating
- **Provide 100% protection from harmful UVA/UVB rays**
- Tough nylon matte black frame
- Anti-Fog venting between the frame and lens
- Rubber nose and ear pads

Fits narrow, round, and up to XL faces

Top Focal is 3/8 inch from the top of the frame down by 1-1/4 inch wide
